DOMINATOR 3.0 HOLE SAW INSTRUCTIONS

1. Follow Front Instruction Sheet to step 13.
2. After completing step 13 you will use the supplied hole saw to open up the center of the coil bucket. The bucket will be cut from the bottom of the bucket to the top. The diameter of the hole saw is 4 3/8" and will self center on the down turned lip of the bucket. Cut slowly until the saw gets started.
3. When finished cutting be sure to apply some paint on the exposed metal.
4. Continue to step 14.
